Summary

Full-stack software engineer with 7+ years of experience building scalable, high-performance web and mobile applications. Expertise in React, Node.js, and PostgreSQL, with proven success improving system efficiency, reducing data processing times, and delivering intuitive user experiences. Strong background in cloud infrastructure (GCP) and enterprise-scale applications, collaborating with cross-functional teams to ship impactful products.

Technologies

Languages: JavaScript (ES6+), TypeScript, SQL, Ruby, PHP

Frontend: React, React Native, HTML, CSS

Backend: Node.js, Express.js, GraphQL, REST APIs, PostgreSQL, Microservices, Pub/Sub (Pulsar)

Cloud & DevOps: Google Cloud Platform, Git, Docker

Other: Testing (Jest, React Testing Library), Zeplin, Agile/Scrum, Jira, SAP

Experience

Everbridge. Inc., Software Engineer

- Developed and maintained microservice-based enterprise resilience applications using React, Node, Pulsar, PostgreSQL, and GraphQL.
- Built an algorithm to cluster business threats, leveraging pub/sub messaging to store and visualize threat data, providing actionable insights to enterprise clients.
- Created a REST API delta endpoint, increasing bulk data upload speeds by 60%, improving response times for customers.
- Archived and processed critical threat data using Node and SQL, enabling contractual reporting and advanced analytics for clients.

Audobon, PA
2023 – present
2 years

Onepak, Software Developer

- Led development of a new B2C React application from concept to MVP, ensuring pixel-perfect UI implementation via Zeplin.
- Maintained and optimized B2B logistics software for clients including Dell and Hewlett Packard, improving operational efficiency in tech equipment recycling.
- Collaborated with design and marketing teams to translate business requirements into visually appealing, functional applications.

Boston, MA
2022 – 2023
1 year

Implico, Software Developer

- Designed and maintained a suite of PERN stack applications supporting fuel logistics at Sam's Club, critical to daily operations.
- Built and deployed a nationwide iOS/Android mobile app for truck drivers to streamline pickups and deliveries.
- Developed SAP Fiori applications to track and maintain master data tables, and implemented SSH & IPsec configurations for real-time fuel measurement updates.
- Overhauled a receipt tracking app used by Walmart and Phillips 66, improving UI and system performance.

Blue Bell, PA
2018 – 2022
4 years

Education

Flatiron School, Software Engineering Bootcamp

2017 – 2017

New Jersey Institute of Technology, Mechanical Engineering (2016 – 2018)

Temple University, History (2011 – 2015)
